

INFECTIOUS DISEASES REPORTED TO THE SHIRE OF NUNAWADING BETWEEN 1914 – JAN 1927.

The details below were taken from reports sent to the Council by local medical practitioners who were obliged to report all infectious cases, and from typed sheets prepared by the Medical Officer. The Council's Medical Officer [Dr A. Vaughan for most of this period] subsequently visited the homes of the infected patient, examined the drains, water and milk supply and sewage disposal system, and offered suggestions as to the cause of the disease. These medical reports are also extant in many cases. Free digital images of the material are available to members; a small fee is asked for non-member requests. Note: The writing on some of the material is extremely poor, so variations of the names given here are entirely possible. An * indicates notification that the person had died.

| Surname | Given name(s) | Address | Age | Disease | Year |
|----------------|------------------------|--|------------|----------------|-------------|
| ABRAHAM | Douglas | Deaf & Dumb Institute Central Rd Blackburn | 29 | Diphtheria | 1924 |
